**To: Hon. Mayor and Members of Council
Community Working Group**

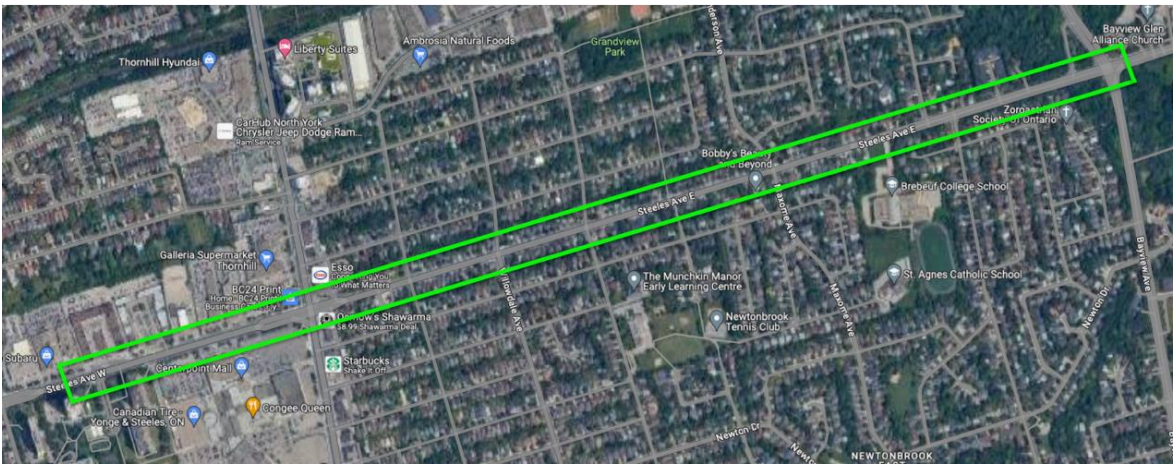

RE: UTILITY WORK AT YONGE ST. AND STEELES AVE. (STEELES STATION)

To support the Yonge North Subway Extension Project (YNSE), Beanfield will complete the relocation of the existing fibre optic cable on the south side of Steeles Ave, crossing over Yonge St. This work is necessary as the existing cable conflicts with the future Steeles Station North Headwall.

The work will be done on the boulevard on Steeles Ave. from Tangreen Crt. to Bayview Ave., with eastbound lane closures on Steeles Ave. during this period. The relocation of the Beanfield cable is being integrated into a larger Beanfield capital project that will result in network enhancement.

As Metrolinx’s work is being integrated into an existing worksite within the current timing of 8am – 5pm and 9pm – 6am, residents and businesses near the work should not experience any additional disruptions.

The existing traffic impacts, including rotating closures of portions of the boulevard and parallel lane in the project area will continue. Signage will be posted as required as part of the Traffic Control Plan.

If you have any questions or concerns, please do not hesitate to contact us.

Sincerely,

Lena Ibrahim
