## Detailed Design for the Restoration of the Eroded East Don River Tributary

Contract: 098-R-24

The City of Markham is starting a detailed design project, "Restoration of the Eroded East Don River Tributary", to repair the eroded and damaged areas along the river following the completion of the Environmental Assessment Study in November 2020.

The City has retained Aquafor Beech Limited, to provide consulting services for this project.

Restoration of the Eroded East Don River Tributary - Project Area

# Pre-Design Notice

---

The design consultant and its sub-consultants will undertake the following activities along the tributary during the design phase:

- 1 - Topographical survey
- 2 - Geotechnical investigation
- 3 - Tree assessment
- 4 - Subsurface Utility Engineering (SUE)
- 5 - Site visit and photo documentation
- 6 - Aquatic and terrestrial surveys
- 7 - Geomorphic survey
- 8 - Archaeology assessment

City staff will continue to keep residents informed and address concerns throughout the design process. The construction schedule will be determined once the detailed design is completed and pending budget approvals. Further notices will be sent out to impacted residents at the end of the design and prior to start of construction to provide updates on construction impacts and timelines.

We understand that this work may cause some inconvenience, and we appreciate your patience as we work to restore eroded areas, safeguard existing infrastructure, and ensure public safety while preserving environmental features.

If you have questions about the design process, please contact the Consultant or City Project Manager, listed below:
