

Phase 2: Environmental Site Assessment (ESA) at 7 & 9 Clark Avenue

Scheduled work period: May 06, 2026, until May 29, 2026

Timing: 8:00 a.m. to 5:00 p.m.

What is happening?

The Phase Two Environmental Site Assessment (ESA) to be initiated at the properties located at 7 & 9 Clark Avenue is to support the Yonge North Subway Extension Project. This phase assesses the environmental conditions of the soil and groundwater.

About the Yonge North Subway Extension

The Yonge North Subway Extension will transform the commute in York Region, Toronto and beyond by extending the TTC's Line 1 subway service north from Finch Station into Vaughan, Markham and Richmond Hill. This extension includes five confirmed subway stations along an extension of roughly eight kilometres.

OVERVIEW OF WORK

- The work involves groundwater monitoring and sampling from previously installed monitoring wells to collect groundwater samples for analysis.
- The anticipated work activities will require approximately three weeks. Field personnel may not be on-site continuously following the drilling.
- **Work may be rescheduled due to weather conditions or unforeseen circumstances.**

WHAT TO EXPECT

- Geotechnical investigations involve drilling holes into the ground - commonly referred to as 'boreholes' - to collect samples of the earth.
- This work involves groundwater testing, which involves temporarily pumping and measuring water underground. The samples provide important data on soil and other underground conditions that inform designs, and construction plans for the project.
- Residences and businesses in the area can expect noise and vibration caused by construction equipment related to this work.

- Crews will take precautions to monitor and reduce dust.
- Please exercise caution around active construction sites.
- No disruptions to traffic or transit are anticipated.
- All pedestrian sidewalks will remain open throughout the work.
